01. Official ARC tariff and appliance list for SENS equipment

ARC tariff category	Weight category (goods declaration weight)	Advance recycling contribution (ARC) excluding VAT
100090	< 0.250 kg	CHF 0.185
100100	≥ 0.250 kg to < 5 kg	CHF 0.56
100110	≥ 5 kg to < 15 kg	CHF 2.31
100120	≥ 15 kg to < 25 kg	CHF 5.56
100200	≥ 25 kg to < 70 kg	CHF 10.00
100210	≥ 70 kg to ≤ 250 kg	CHF 18.52

Batteries

Batteries are taken into consideration in the ARC tariff for a sales unit. Loose batteries must be settled directly with Inobat.

Fitness equipment

Fitness equipment ≥ 5 kilograms has an ARC of CHF 0.56 (100100) as a general rule.

Safes and gun cabinets

Up to a total weight of 25 kilograms they need to be declared. Starting at 25 kilograms, the entire disposal costs must be paid by the person disposing of the goods.

Shower toilets and WC terminals, beds, tables and massage chairs

The motor must be declared.

Light electric vehicles with energy storage

Light electric vehicles with energy storage (e.g. e-bikes, Segways or similar) must be registered directly with Inobat. Please note: Register e-bikes in category 88100 at Inobat. Inobat coordinates the payment of ARCs and ADFs directly with SENS.

Lamps with batteries

Battery-powered lamps and lighting equipment are reported under 70050x etc.

Lights with additional function

Luminaires with additional functions such as motion detectors or fire detectors are charged by weight under category 100090. If this luminaire is supplied with a replaceable light source, this does not have to be reported.

Excluded are

Generators that run on petrol or diesel are excluded from the ARC

Loose cables and adapters are excluded from the ARC

Shoes and clothes with lights and batteries do not have to be registered with SENS.

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the ARC Commission.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.eRecycling.ch. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- Each of the ARC tariffs is valid for one year. **New appliances are also added to the existing categories during the year and marked in red.**

Further explanations regarding the tariff list

- **Goods declaration weight = net weight, including operating accessories, without special accessories. A maximum of two accessories can be declared.**
- **Special accessories such as cases and suitcases do not have to be declared.**
- ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.
- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARCs subject to verification that it has actually been exported.

Valid for appliances with electrical and/or electronic components (plugs or batteries for household appliances and other appliance groups and lamps) of the following products:

Alarms and security and monitoring equipment

e.g. alarm systems, sirens, horns, all types of motion sensors, fire detectors, random generators, dimmer switches, doorbells, fingerprint scanners, door openers, monitoring systems, electric door locks, light controllers, lasers, simulators

General household and kitchen equipment

e.g. appliances for ironing, sewing, cutting, pressing, mixing, chopping, kneading, baking, as well as thermoelectric wine coolers and coolers without compressor, fragrance plug, **all types of food processors, vacuum sealers**

Articles of animal supplies

e.g. grooming accessories, feeders, clippers, toys, aquarium and terrarium accessories, access flaps, electric fence chargers

Building technology

e.g. radiators, direct-air heaters, thermal storage heaters, heat wave lamps, hot-air ventilators, electric fireplaces, convectors, generators, compressors, electric water boilers up to 25 kg, digital room and radiator thermostat, ventilation, filtering and air-conditioning equipment, fuse boxes with all fuses, charging stations for electric cars (mobile and fixed stations), wall box chargers for electric cars, payment stations for household appliances

Hoisting, towing, pumping, weighing and load-transporting equipment

e.g. winches, hoisting gear, laser spirit levels, water pumps, transport rollers

Garden and property-maintenance equipment

e.g. appliances for decalcification and shredding, mowers, pumps, trimmers, scarifiers, **filter systems**, snow ploughs, controllers for sprinkler systems and swimming pools, water features with pumps, cleaning machines

Appliances with batteries may come under the heading of power tools in this category.

Equipment for the production, preparation, conversion or measurement of electrical energy or compressed air

e.g. chargers, converters, ballast units (for the production, preparation or conversion of electrical energy or compressed air), transformers, all kinds of measuring devices, vacuum chambers, power bank with additional function (light, etc.)

Devices for producing and processing materials

e.g. tools for drilling, milling, riveting, welding, nailing, sawing, polishing and grinding, as well as 3-D printers for producing tools

Cleaning and waste disposal equipment

e.g. suction systems, pipe and drain cleaning systems, steam cleaners, air purifiers, filter systems, sterilisation equipment, high-pressure cleaners, descaling appliances

Devices with electric locking device for safe storage

e.g. safes, cassettes, gun safes

Barbecues (no charcoal barbecues)

e.g. garden barbecues, table-top barbecues, raclette and pizza ovens, electric barbecues

Coffee machines

e.g. espresso makers, filter machines, fully automated systems

Miscellaneous small devices

e.g. weather stations, thermometers, wall and table clocks, alarm clocks, animal deterrent and insect abatement systems, ground moisture sensor equipment, **lint shavers**

Cooking and baking equipment

e.g. ovens, extractor hoods, vents, air-recirculating systems, cookers, steamers, grills

Medical devices, body analysis devices

e.g. blood pressure measuring devices, bathroom scales, thermometers, pain therapy devices, cycle measuring devices, alcohol tester, blood sugar meters

Professional medical equipment (non-contaminated) can be found on page 25

Body care, haircare, nail care and hygiene equipment

e.g. hairdryers, tanning equipment, shavers, sauna equipment, curlers, light curing devices for nails, manicure and pedicure items, massage devices, trimmers, epilators, waxing devices, disinfection dispenser with sensor, hand dryers

Sports, leisure and fitness equipment and fitness equipment

e.g. heart-rate monitors, wristwatches, GPS equipment, distance meters, fit systems, avalanche search equipment, shoe heaters, child seats that play music, functional drones (not assembly kits), Multiplex FunJet, whirlpools and shower toilets (motor and control only), infrared cabins, heating blankets, alarm boxes for motorbikes and bicycles, massage chair and bed motors, all types of controls, golf accessories, rifle scope with battery

Fitness equipment ≥ 5 kilograms has an ARC of CHF 0.56 (100100) as a general rule.

Vacuum cleaners and floor-cleaning equipment

e.g. multifunctional vacuum cleaners, manually operated sweepers, wet-and-dry vacuum cleaners, cleaning machines with and without batteries

Washing, drying and steam treatment

e.g. washing machines, tumble dryers, spin dryers, fully automatic washing machines

Sex toys

e.g. massage wands, vibrators

The product list is not exhaustive.

02. Official ARC tariff and appliance list for refrigeration, air-conditioning, freezing and room-air treatment appliances with and without compressors

Equipment measuring up to: height + width + depth ≤ 420 centimetres

ARC tariff category	Weight category (goods declaration weight)	Advance recycling contribution (ARC) excluding VAT
100300	< 25 kg	CHF 9.26
100310	≥ 25 kg to < 100 kg	CHF 26.00
100320	≥ 100 kg to < 250 kg	CHF 46.30
100330	≥ 250 kg	CHF 55.56

Regulations for refrigerator display cabinets and free standing refrigeration cabinets

- Refrigerator display cabinets are definitely excluded from the ARC financing solution and disposal of these appliances is always subject to a charge.
- Not all free standing refrigeration cabinets can be charged via the ARC. The following criteria will be applied:
Very large appliances are excluded: total mass (length + width+ height) ≥ 4.2 m.

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the Swiss ARC Commission.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.erecycling.ch/en/. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- Each of the ARC tariffs is valid for one year. **New appliances are also added to the existing categories during the year and marked in red.**

Further explanations regarding the tariff list

- ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.
- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARCs subject to verification that it has actually been exported.

Applicable to equipment with electrical and/or electronic components and batteries for household appliances in the following product groups:

Automatic flake-ice dispensers, ice-cube makers, ice-cream makers

Freezer appliances, upright freezers and deep-freeze appliances, chest freezers and deep-freeze appliances

Chilled beverage dispensers

Solid, commercial refrigeration appliances

e.g. commercial chillers, commercial refrigerators, upright models, commercial refrigerated islands and gondolas

Air-Conditioning units

e.g. air-conditioning units – interior, exterior, mobile, for caravans, split air-conditioning units with compressors

Cool boxes with compressors, gas-powered refrigerators

Coolers, refrigerators, food centres

Room-air treatment units with compressors

e.g. dehumidifiers, room-air clothes dryers

Heat pump dryers and tumble dryers with compressors

Wine chillers, wine refrigerators

Other compressor equipment for refrigeration or air-conditioning

Steam irons and cleaning systems

The product list is not exhaustive.

03. Official ARC tariff and appliance list for Lamps with and without batteries and Illuminant equipment

ARC on Lamps with electrical connection

Tariff category for Light	Per piece	Advance recycling contribution (ARC), excluding VAT
700180		CHF 0.18

For the ARC, the distinction between removable and non-removable (or integrated) illuminants is relevant.

- In the case of removable illuminants, the **light** and the **illuminant** are considered separately and subject to a separate ARC.
- **Light CHF 0.18 excl. VAT and illuminant CHF 0.16 excl. VAT.**
- In the case of non-removable illuminants, the light is subject to a single ARC of CHF 0.18 excl. VAT.

Lights

e.g. pendant lights, drop lights, ceiling lights, recessed ceiling lights, downlights, wall lights, floor lamps, table lamps, furniture lights, industrial or business lighting, outdoor lights, backlit panels and illuminated signs, Christmas lights, rope lights with plug, light curtains, lighted figurines, bedside lamps, fairy lights with plug

The product list is not exhaustive.

- Lights with additional functions, such as motion detectors or fans, must be reported in the SENS appliance category.
- Light switches are reported in the SENS appliance category.
Removable elements such as mounting rails, power rails, suspension structures, secondary reflectors and candelabras are not constituent parts of lights.

Definition Light with or without battery

A light is an inseparable device that serves exclusively to hold the illuminant or that can form a functional unit in combination with a permanently integrated, non-replaceable illuminant and, if need be, an associated control unit.

ADF and ARC for lamps and illuminate equipment (light bulbs) with batteries

ARC tariff category Lamps with batteries	Weight category (goods declaration weight with battery)	Advance recycling contribution (ADF and ARC), excluding VAT
700500	< 0.250 kg	CHF 0.25
700501	≥ 0.250 kg < 2 kg	CHF 0.70
700502	≥ 2 to < 5 kg	CHF 0.75
700503	≥ 5 kg	CHF 2.63

Lights and lamps with battery or rechargeable battery

e.g. emergency lights, garden lights, light bands, night lights, battery lights, bedside lamps, Christmas tree candles, bicycle lights, lanterns, LED spots that change colour with remote control, cabinet lighting with battery, LED strips, under-cabinet lights, switch lights, strip lights, tent lights, mirrors with light, etc.

outdoor lights, backlit panels and illuminated signs,
rope lights with plug, light curtains, lighted figurines, fairy lights

ARC Illuminant (light bulbs)

Tariffkategorie für Illuminant equipment (light bulbs)	Per piece	Advance recycling contribution (ARC, excluding VAT)
700200		CHF 0.16

Illuminant (light bulbs)

e.g. LED (light emitting diode) – lamps, discharge lamps, metal halide lamps, induction lamps, compact fluorescent lamps (energy-saving lamps), fluorescent lamps, fluorescent tubes, sodium vapour lamps, mercury vapour lamps

Definition of Illuminant (light bulbs)

Illuminants are used for the production of light, are interchangeable and always form a light source.

ARC for light conversions

- When a light is converted to LED, the new illuminant is only subject to an ARC if it can be replaced without outside assistance (i.e. by the consumer).
 - The ARC is CHF 0.16 per illuminant
 - The disposal of the old illuminant is financed
- If the conversion needs to be performed by a specialist, the new illuminant is not subject to an ARC
 - The disposal of the old illuminant is financed
 - The disposal of the light incl./excl. LED illuminant is financed

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the ARC Commission.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.eRecycling.ch. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- Each of the ARC tariffs is valid for one year. **New appliances are also added to the existing categories during the year and marked in red.**

Further explanations regarding the tariff list

- ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.
- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARCs subject to verification that it has actually been exported.
- Equipment earmarked for export is exempt from ARCs subject to verification that it has actually been exported.

04. Official ADF tariff and appliance list for torches and head torches

ADF on torches and head torches

Tariff category	Weight category for torches*	Advance disposal fee (ADF), excluding VAT
320090	< 0.250 kg	CHF 0.20
320100	≥ 0.250 kg	CHF 0.40

* The weight of the torch without batteries determines the weight category and thus the advanced disposal fee.

Notes

- Tariffs have been set following negotiations with Inobat, taking the current ADF tariff for batteries into account, and are valid for one year, provided that the relevant authority does not amend the ordinance on the ADF for batteries.
- Contractual partners registering torches directly with Inobat are excluded from the obligation to register with SENS.
- Torches sold without batteries are still exempt from the ARC.

05. Official ARC tariff and appliance list for power tools and garden appliances, including battery-powered robots

ADF and ARC on power tools and battery-powered robots

Without batteries, these devices are reported in the SENS appliance category 01.

ARC tariff category	Weight category for power tools, including battery	Advance disposal fee and advanced recycling contribution (ADF and ARC), excluding VAT
310090	< 0.250 kg	CHF 0.49
310095	≥ 0.250 kg < 2 kg	CHF 1.46
310100	≥ 2 kg < 5 kg	CHF 2.16
310110	≥ 5 kg < 15 kg	CHF 5.51
310120	≥ 15 kg	CHF 10.38

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the ARC Commission.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.eRecycling.ch. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- Each of the ARC tariffs is valid for one year. **New appliances are also added to the existing categories during the year and marked in red.**

Further explanations regarding the tariff list

- **Goods declaration weight = net weight, including operating accessories, without special accessories. A maximum of two accessories can be declared.**
- **Special accessories such as cases and suitcases do not have to be declared.**
- ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.

- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARCs subject to verification that it has actually been exported.

Applicable to equipment with electrical and/or electronic components (lithium batteries) in the following equipment groups:

Tools for machining materials and measuring equipment with batteries

e.g. tools for drilling, milling, riveting, welding, nailing, sawing, polishing and grinding, portable measuring devices, lawnmowers

Robots

e.g. robotic vacuum cleaners and lawn mowing robots and other auxiliary robots

The product list is not exhaustive.

06. Official ADF tariff and appliance list for replacement batteries for power tools and robots

ADF on loose batteries (replacement batteries of power tools only or robots)

Restriction

Loose accumulators/batteries may only be reported via SENS if the contractual partner declares power tools and/or robots to us. If this is not the case, loose batteries should be reported directly to Inobat.

Tariff category	Weight category for loose power-tool batteries	Advance disposal fee (ADF) excluding VAT
390090	< 0.250 kg	CHF 0.25
390100	≥ 0.250 kg < 0.750 kg	CHF 0.80
390110	≥ 0.750 kg < 5 kg	CHF 1.60
390120	≥ 5 kg ≤ 15 kg	CHF 9.60

Notes

- Tariffs have been set following negotiations with Inobat, taking the current ADF tariff for batteries into account, and are valid for one year, provided that the relevant authority does not amend the ordinance on the ADF for batteries.

07. Official ARC tariff and appliance list for toys and games

ARC appliance list:

- A listed appliance is only subject to an ARC if it contains an electrical or electronic component.
- Drones sold as assembly kits are considered toys.

Tariff category according to warehouse stocking price

(See below for definition of warehouse stocking price)

ARC tariff category	Warehouse stocking price	Advance recycling contribution (ARC) excluding VAT
400110	Exemption limit up to CHF 19.99	exempt
400120	CHF 20.00 to CHF 59.99	CHF 0.46
400130	From CHF 60.00	CHF 0.46
400150	Organs and vehicles with a warehouse stocking price of CHF 200 and over	CHF 0.46
400160	Video consoles (hardware only; no ARC on memory cards and video games) not including PlayStation and Xbox	CHF 0.46

Warehouse stocking price

- Purchase price adjusted for currency, plus freight, customs, insurance, and further surcharges and discounts applicable prior to delivery to the warehouse (corresponds to the classic calculation of the cost price).

The product list is not exhaustive.

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the Swiss Toys and Games Association.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.eRecycling.ch. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- Each of the ARC tariffs is valid for one year. **New appliances are also added to the existing categories during the year and marked in red.**

Further explanations regarding the tariff list

- ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.
- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARs subject to verification that it has actually been exported.

If you have any issues and/or questions concerning the appliance list, or proposals regarding the amount or application of the ARC, you have the option to intercede. You can contact the following people:

The SENS Foundation
Customer team
Tel. +41 43 255 20 00
E-mail info@sens.ch

or to the representation of the ARC Commission: www.erecycling.ch/en/sens

08. Official ARC tariff and appliance list for photovoltaic modules and their components

ARC on photovoltaic modules and their components

ARC tariff category	Photovoltaic modules, including components (power inverters, switch elements, control systems, etc.)	Advance recycling contribution (ARC), excluding VAT
600110	per kg	CHF 0.04

Solar power storage units

Solar power storage units must be registered directly with Inobat.

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the Swiss Toys and Games Association.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.eRecycling.ch. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- Each of the ARC tariffs is valid for one year.

Further explanations regarding the tariff list

- ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.
- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARs subject to verification that it has actually been exported.

E-mail info@sens.ch

or to the representation of the ARC Commission: www.erecycling.ch/en/sens

09. Official ARC tariff and appliance list for heat pumps

ARC tariff category	according to heating capacity	Advance recycling contribution (ARC), excl. VAT
150300	≤ 20 kW	CHF 38.00
150310	≤ 50 kW	CHF 85.00
150320	≤ 350kW	CHF 105.00

For the following types of appliances

Heat pumps with a heating capacity ≤ 350 kW

Heat pump water heaters with a heating capacity < 20 kW

Heating capacity with A-7/W35 rated load) air/water appliances

B-o/W35 (rated load) brine/water appliances

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the Swiss Toys and Games Association.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.eRecycling.ch. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- Each of the ARC tariffs is valid for one year.

Further explanations regarding the tariff list.

- ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.
- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARs subject to verification that it has actually been exported.

10. Official ARC and ADF tariff and appliance list for e-cigarettes

ARC tariff category	Appliance category	Advance recycling contribution (ARC)	ARC and ADF excl. VAT
110100d	Disposable e-cigarettes	CHF 0.10	CHF 0.10
110105d	Reusable e-cigarettes	CHF 0.10	CHF 0.10
110110d	Battery carrier with a permanently built-in battery	CHF 0.10	CHF 0.10
110115d	Battery carrier without battery	CHF 0.05	CHF 0.05

Batteries

Batteries are included in the ARC tariff of a sales unit.

"Loose batteries and accumulators" must be settled directly with INOBAT.

For the following types of appliances:

Appliance	Specification of ARC tariff category 110100d	Battery
	Disposable e-cigarettes classic ☒ Disposable ☐ Reusable ☒ With battery ☐ With cable (without battery)	☒ Permanently built in ☐ Exchangeable

Appliance	Specification of ARC tariff category 110105d	Battery
	Reusable e-cigarettes ☐ Disposable ☒ Reusable ☐ With battery ☒ With cable and battery ☐ With cable (without battery)	☒ Permanently built in ☒ Exchangeable

Appliance	Specification of ARC tariff category 110110d	Battery
	Battery carrier with a permanently built-in battery ☒ Disposable ☒ Reusable ☐ With battery ☒ With cable and battery ☐ With cable (without battery)	☒ Permanently built in ☐ Exchangeable

Appliance	Specification of ARC tariff category 110115d	Battery
	Battery carrier without battery ☐ Disposable ☒ Reusable ☐ With battery ☐ With cable and battery ☐ With cable (without battery)	Loose batteries and accumulators must be settled directly with Inobat.

Explanations regarding prices and validity of ARC tariffs

- Responsibility for the ARC tariff and appliance list, including price suggestions, lies with the Swiss Toys and Games Association.
- Every sector is represented by its own representatives in the ARC Commission. Membership details can be found at www.eRecycling.ch. Should you have any enquiries, please contact SENS or your representatives.
- Please send requests for changes to the ARC tariffs directly to the SENS Head Office or your industry representative in the ARC Committee. The Commission will discuss the proposals at its spring or autumn meeting.
- The ARC is reviewed annually on the basis of the calculated collection rate and adjusted as necessary. The review takes place on 1 September each year for the respective following year. For the purpose of determining the ARC, the declared quantities in the second half of the previous year and the quantities in the first half of the current year are compared with the quantity collected during the same period.

The product list is not exhaustive.

If you have any issues and/or questions concerning the appliance list, or proposals regarding the amount or application of the ARC, you have the option to intercede. You can contact the following people:

150200d	≥ 25 bis < 70 kg	CHF 10.00
150210d	≥ 70 bis ≤ 250 kg	CHF 18.52

ADF and ARC on electronic medical equipment B2B

Skin diagnostic equipment

Skin analysis equipment

Lasers for hair removal

Laboratory equipment

Ultrasound

The product list is not exhaustive.

Comments

- ARC obligation: ARCs are payable on all equipment with electronic and/or electrical components and which falls within the equipment groups shown, irrespective of whether or not it is used for commercial purposes.
- ARCs are payable on both warranty and replacement parts from 1 January 2011.
- Demonstration appliances that are not currently and will never be for sale are not subject to ARCs.
- Equipment earmarked for export is exempt from ARCs subject to verification that it has actually been exported.

13. Official ARC tariff and appliance list for shelving systems

ADF and ARC on electronic shelving systems (price tags)

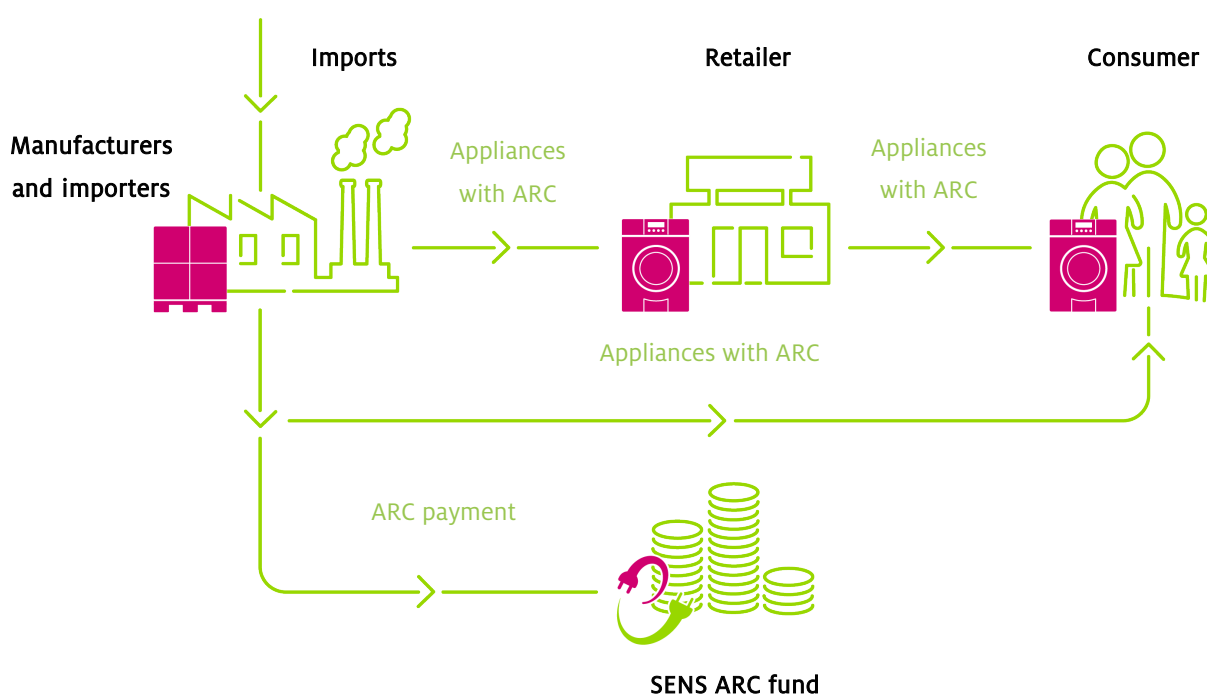

ARC tariff category	Size/type	Advance disposal and recycling contribution (ADF and ARC), excluding VAT
350050	All sizes, types	CHF 0.185

Notes

- Tariffs have been set following negotiations with Inobat, taking the current ADF tariff for batteries into account, and are valid for one year, provided that the relevant authority does not amend the ordinance on the ADF for batteries.

14. Declaration obligation

In principle, the producer or importer pays the ARC to SENS as the initial distributor. Any delegation of the declaration obligation is only possible in exceptional cases (e.g. own brands). The prior approval of SENS is mandatory and only valid with their permission. The respective form from SENS must be signed by both partners. Any cases of double reporting will result in an unscheduled inspection.

The declaration is always due in the following month.

Example: vRG declaration for the period from 01.01.2023 to 30.06.2023.

You enter the declaration in the following month "July".

15. Pricing transparency for the ARC

The manufacturers and importers calculate the ARC according to the above tariff categories; the fee is transferred to the retailer.

The retailer passes the ARC on to its customers.

Please note the Ordinance of 11 December 1978 on Price Indication (Ordinance of 11 December 1978 on Price Indication – PIO); SR 942.211.

The new instructions for 2019 can be found at www.seco.admin.ch

Importer to retailer

Item No.	Item description	Quantity	Unit price CHF	Total CHF
35689	Microwave	1	79.35	79.35
	Advance recycling contribution (ARC)	1	0.56	0.56
